

CHRISTMAS PAPER CHAIN TEMPLATES

CHRISTMAS TREE • STAR • SNOWMAN • REINDEER

HOW TO FOLD A PAPER CHAIN:

1. Cut a piece of printer paper or construction paper in half and use one side.
2. Fold the strip of paper in half. Fold it in half a second time. Fold in half once more for a total of three folds.
3. Unfold the strip of paper and refold it accordion style along the creases.
4. After the paper has been folded, turn it so that the folded edge of the top flap is on the left and the right side opens like a book.
5. Cut out the templates above along the dotted lines and trace them onto the folded paper. Make sure that one edge of the template is touching the edge of the right side. This will ensure that the chain will connect.
6. Cut along the lines and unfold to reveal your paper chain!
